

CAPABILITY STATEMENT

Software testing and AI automation **you can rely on.**

A Singapore based team of testing and automation specialists, helping organisations across the region release with confidence.

Testing

independent quality
assurance

Automation

AI and process
automation

Singapore

based specialists

Weeks

not months, with our
accelerators

WHO WE ARE

Focused on testing and automation

AJQ Consulting Pte Ltd is a Singapore company specialising in software testing and AI driven automation for banking, insurance, wealth, government and enterprise clients across the region.

WHAT WE DO

Two disciplines, done properly

Software Testing

Independent quality assurance across the full lifecycle, with automation built in from the start.

- Test strategy and management
- Functional, integration and user acceptance testing
- Test automation with Playwright and Selenium
- Performance and load testing
- Testing of AI enabled applications

AI & Automation

Practical automation that takes manual, high volume work off your people.

- Enterprise process automation
- Document intelligence
- AI data remediation and migration
- AI assistants and bots
- Workflow orchestration

HOW WE ENGAGE

Specialists in your team

Testers and automation engineers for a project or a peak.

Defined packages

A scoped piece of work delivered end to end.

Discovery first

A short discovery to find where automation pays off.

WHY TEAMS WORK WITH US

WHAT YOU GET

Experienced specialists

Testers and automation engineers who are productive from the first week.

Proven accelerators

Ready built frameworks so projects start ahead.

Flexible engagement

Embedded specialists, defined packages or peak support.

Regional reach

A Singapore base supporting clients across the region.

ACCELERATORS WE BRING

Proven on client work

Test Automation Frameworks

Reusable Playwright and Selenium frameworks integrated with your CI/CD pipeline.

Performance & Soak Testing

Enterprise grade load testing without costly licences.

Enterprise Process Automation

AI assisted bots and workflows deployed inside your own environment.

AI Data Remediation

Cleanse, match and correct large data sets with AI rules and human review.

Document Intelligence

AI powered OCR with governed human review.

AI Assistants

Assistants grounded in your own documents for help desks and triage.

PLATFORMS
